

## Other Finishing Techniques

### Crackle Finish

The Crackle Finish can be done with just mild to extreme cracks giving the piece a very weathered look.

### Sand/Rub Through Finish

The Sand/Rub Through Finish has one color on top of another color. The top color is then sanded or rubbed exposing the original color underneath. This method gives a worn look to the piece. Sand/Rub Through Finish can be complimented with distressing.

## Other Finishing Techniques

### Glazing

Glazing adds shade or shadowing to mouldings and routed profiles. The Glazing can be a similar color or a contrasting color depending on desired results. This method like Crackle can be as mild or extreme as one would like this can also be complimented by distressing. This gives the piece an antique look.

### Distressing

Distressing is adding wormholes, dents, v-groves and wood splits to a piece of furniture. This gives a lived in or antique look to the piece of furniture. It can be as mild or extreme is desired. Glazing, Sand/Rub Through and Crackle Finishes all compliment Distressing.
